	Windows® Server 2003 Enterprise, Standard, Small Business Server (SP2)	✓			✓
Windows® 10	Windows® 10 (Home, Pro, Education, Enterprise)				✓
Windows® 8	Windows® 8.1 Standard, Enterprise, Professional				✓
	Windows® 8 Professional, Enterprise	✓			✓
Windows® 7	Windows® 7 Professional				✓
	Windows® 7 Ultimate, Enterprise (SP1)				✓
	Windows® Embedded Standard 7 (SP1)	✓			✓
Windows® XP	Windows® XP Professional (SP3)				✓
Red Hat® Enterprise Linux®	Red Hat® Enterprise Linux® 7.0, 7.1, 7.2, 7.3 (see Note 2.5)				✓
	Red Hat® Enterprise Linux® 7.0, 7.1, 7.2, 7.3 with KVM (see Note 2.5)				✓
	Red Hat® Enterprise Linux® 6.3, 6.4, 6.5, 6.6, 6.7, 6.8 Basic, Web Server (see Note 2, 6)	✓			✓
	Red Hat® Enterprise Linux® 6.5, 6.6, 6.7, 6.8 with KVM (see Note 2, 6)				✓
	Red Hat® Enterprise Linux® 5.9, 5.10, 5.11 Basic, Web, Advanced Server (see Note 1, 4)	✓			✓
	Red Hat® Enterprise Linux® 5.11 with KVM (see Note 1, 4)				✓
SuSE® Linux®	SuSE® Linux® Enterprise Server 11 (SP3)				✓
	SuSE® Linux® Enterprise Server 11 (SP3) with XEN				✓
Oracle® Linux®	Oracle® Linux® Server 6.5 Server, Web Server (Red Hat Compatible Kernel, Unbreakable Enterprise Kernel)				✓
	Oracle® VM Server 3.2.8				✓

Notes

Important JRE Compatibility Notes: PowerChute Business Edition 9.2 has been verified with the bundled Java version JRE 8 Update 31 while v9.1.1 has been verified with the bundled Java version JRE 7 Update 25.

To install JRE updates, please use the JRE Configuration Tool available from <http://www.apc.com/tools/download/index.cfm> [Select Software Upgrades - PowerChute Business Edition and submit] JRE Configuration Tool sku - SFPCBEJRE. Additional information is available in the associated "PowerChute Business Edition - JRE Configuration Tool Help"

- For information on installation of PowerChute Business Edition on Agent Console Communication issues after a JRE Upgrade, please refer to ID **FA264735**, **FA264736** & **FA253753** at <http://www.apc.com/us/en/faqs/home/>

- PowerChute Business Edition does not work using JRE 8 Update 91 or higher - for more details and to download v9.2.1 which fixes the issue see **FA304446** at <http://www.apc.com/us/en/faqs/index?page=content&id=FA304446>

Browser Support: PowerChute Business Edition has been tested with the following browsers; IE8, IE9, IE10, IE11 (for Windows Server 2012 & Windows 8), Firefox 24 & 36, Chrome 29 & 40.

Communications Support: Both Serial and USB communications are supported in Windows. RedHat Enterprise Linux 6.4 supports both Serial and USB connections.

For older RedHat Linux versions and SuSE Linux only Serial connection is supported.

Centralized Management: To centrally manage PowerChute Agents, the PowerChute Server and Console should be at least the same version as the latest Agent. (A newer version of the Server / Console can manage older Agents).

Note 1: PowerChute Business Edition only supports Red Hat® Enterprise Linux® if Xen Virtualisation software is not installed or disabled. Please see **FA159665** at <http://www.apc.com/us/en/faqs/index?page=content&id=FA159665>

Note 2: If "Failed dependency error on terminal" occurs during installation of PowerChute Business Edition on an x64 platform, please see **FA159745** at <http://www.apc.com/us/en/faqs/index?page=content&id=FA159745>

Note 3: For information on successful guest OS shutdown, please refer to Microsoft kb **KB2887595** (<http://support.microsoft.com/kb/2887595>)

Note 4: For information on installation of PowerChute Business Edition on Red Hat® Enterprise Linux® 5.8, 5.9, 5.10 or 5.11, please see **FA173375** at <http://www.apc.com/us/en/faqs/index?page=content&id=FA173375>

Note 5: For information on installation of PowerChute Business Edition on Red Hat® Enterprise Linux® 7.0, 7.1, 7.2 or 7.3, please refer to Knowledge Base ID **FA233404** at <http://www.apc.com/us/en/faqs/index?page=content&id=FA233404>

Note 6: For installation of PowerChute Business Edition on Red Hat® Enterprise Linux® 6.8, JRE 8 Update 77 or lesser needs to be used.
